

DNA - Disposable Delivery System

AVID 2024: AVID Code
AVID 2324: ISO Code
AVID 3001: DNA Injector

The AVID DNA Identification System features a single use disposable needle assembly for rapid, error free animal identification. The disposable needle assembly fits securely on the injector pistol and comes preloaded with a sterile 12mm microchip and is designed to be used with the injector pistol (AVID3003 - sold separately); the injector pistol provides a quick, sterile injection of the microchip transponder - Ideal for environments where microchip implant protocols require minimal handling while assuring sterility of the microchip transponder.

Disposable Needle Assembly

AVID2024 (AVID Code) AVID2324 (ISO)

The AVID DNA System is ideal for field and clinical use!

The AVID2024 (AVID Code) or AVID2324 (ISO) DNA needle assembly is designed for use with the AVID3003 pistol only - Each unit includes four peel and stick labels with corresponding Identification tags. Available in lots of 25 units.

DNA Injector Pistol
AVID3003

The AVID DNA Injector Pistol is to be used with the DNA needle assembly. It is designed for multiple uses and is made of a high impact plastic. The needle assembly fits securely on the injector pistol making it ideal for field or clinical use.
